

PROTECT WHAT MATTERS.

JRM Chemical's linear anionic polymers for soil erosion and waterway applications work safely and efficiently secure and protect the earth's resources.

Our professional polymer products get the job done:

- Reduce soil loss as well as chemical and fertilizer runoff
- Increase water infiltration
- Reduce labor to repair rills, gullies, and erodible soils
- Drive cost-efficient site operations

Put the JRM advantage to work on your jobsite.

- Full family of erosion products – powders, emulsions and tablets
- ANSI/NSF 60 approved standards
- Site-specific polymer formulas
- Formulated for use with hydro seeding, over sprays, and turbid water application

Designed by professionals, for professionals, JRM polymer products drive your on-the-job performance.
