SEED COAT

Ideal for Grass Seed & More

Sprout Your Sales with Soil Moist Seed Coat

Soil Moist Seed Coat is a crosslinked polymer and graphite compound. It is designed to increase the germination of grass and other types of seeds. The polymer compound retains excess moisture from water and humid air. The moisture on the seed softens its tissue to promote faster germination. The graphite compound retains heat on the surface of the seed to promote germination. The graphite helps lubricate the seed and equipment to help spread the seed. Eight ounces of Seed Coat will treat 50 pounds of grass seed.

BENEFITS:

- ✓ Increases seed germination
- ✓ Reduces germination time
- ✓ Promotes even coverage
- ✓ Cost Effective: 8 oz. treats 50 lbs. of seed
- ✓ Effective on all types of grass seed

Soil Moist Seed Coat is a good cross-merchandise item with all your grass seed sales.

Soil Moist Seed Coat is packed in retail 8 oz jars. Available in commercial sizes.
