

FOR IMMEDIATE RELEASE.....

JRM Chemical introduces two new products, *Deco Beads and Deco Cubes*.

Deco Beads are new innovative polymers that swell up into round gel beads to create glimmering floral and candle arrangements. These translucent beads are considerably less expensive than marbles or stones. Easy to use, just add water! One half of an ounce makes over 1 ½ quarts of decorative gel beads.

Deco Beads and *Deco Cubes* are ideal for silk and fresh cut flower arrangements. They can be used for several events; weddings, birthdays, parties, graduations and more.

Available in clear and five eye catching colors. Available in retail packages and in bulk commercial sizes. *Deco Beads* and *Deco Cubes* are non toxic and safe to use.
