

Tree Moist is designed to store water in a crystal form that reduces tree waterings and water spillage. The crystals absorb water like a sponge and release it over an extended period of time. Easy to use, low maintenance required. Ideal for locations that do not allow water in Christmas tree stands.

DIRECTIONS FOR CUT CHRISTMAS TREES:

1. Cut 1-inch off tree trunk, place in stand and secure.
2. Fill tree stand with WARM water, add preservative if using.
DO NOT FILL TOP 2 INCHES.
WAIT A MINIMUM OF 48-72 HOURS.
3. Add more water to tree stand if needed.
4. Add two tablespoons (1 oz) of Tree Moist granules per gallon of water to tree stand.
5. Check level of gel after 24 hours, and again every 1-2 weeks. Add water if needed.

CAUTION:

Spilled material is slippery when wet.
Sweep up spills.
Do not dispose in drains.
Non toxic.
Keep out of reach of children.

CONTENTS:

99.7% Crosslinked polyacrylamide
0.3% Inert ingredients.
