Soil Moist™ Plant Paks

The easiest way to keep plants watered!

Offer

regular Plant Paks and Plant Paks Plus with fertilizer!

Consumers love how Soil Moist works:

Its polymer granules absorb excess moisture like a sponge, as the soil dries, the granules slowly release the stored water back to the plant. The Soil Moist Paks are designed to reduce plant waterings by 50%. Soil Moist Plus Paks contain an 8-9 month timed release 9-3-6 Fertilizer.

Now, no measuring—no mess! Plant Paks make it even more appealing by providing pre-measured Soil Moist in biodegradable “drop-in bags.” Now plant watering and feeding couldn’t be easier, quicker or neater!

They’re your smart choice, year-round!

Expect healthy multiple and repeat sales, because Soil Moist Plant Paks are ideal for larger indoor and outdoor plants—and using several per plant provides the best results. Bright, colorful, packaging announces the unique benefits, too, wherever you feature them in your store.
