

# Soil Moist Natural...Naturally.

NEW

Soil Moist Natural is a grafted starch polymer designed to reduce plant waterings by 50% and last in the soil for an entire season. The organic starch in Soil Moist Natural is derived from corn. Soil Moist Natural is completely safe and biodegradable like our other Soil Moist polymer products. Soil Moist Natural will hold several hundred times its weight in tap water, and readily releases it back to the plant as the soil dries out.

## The Soil Moist dealer receives a superior product featuring:

- Attractive self-sell packaging
- Marketing support with national advertising
- Easy to use with step-by-step instructions
- Three sizes of Soil Moist Natural
- Unlimited number of indoor/outdoor applications
- Over twenty years of manufacturing experience
- A full family of polymer products

## Soil Moist Natural is available in three sizes:

3 oz. bags  
10 oz. bags  
34 oz. jugs

Code	Description	Case Pack	Case Wt.	Case Size	UPC
