

## **FOR IMMEDIATE RELEASE.....**

### **Soil Moist Mycorrhizal Starter Kit**

JRM Chemical introduces their *new* **Soil Moist Mycorrhizal Starter Kit**. The kit includes five different mycorrhizal products for retail sales. Mycorrhiza is the relationship between the plant root and beneficial fungi. The fungi improves the ability of plants to utilize the soil resources and improves water and nutrient uptake by providing a larger root mass. Soil Moist water storing polymers are also included to reduce waterings. Our “Plus” products add a timed release fertilizer.

The Kit includes:

- 1 case of three ounce Transplant bags
- 6 each of one pound Transplant jars
- 6 each of eight ounce Container Mix Plus jars
- 6 each of one pound Flower and Garden Plus jars
- 2 each of eight ounce Organic Blend jars

Organic Blend is a mixture of beneficial bacteria that helps to improve the root zone fertility and organic content in the soil.

These mycorrhizal products offer a nice variety for retail sales for plantings of trees, shrubs, containers, beds and vegetables.
