

## **How to use Soil Moist Vacation Watering Mat for indoor and outdoor potted plants:**

The Soil Moist Vacation Watering Mat keeps potted plants watered for UP TO 3 WEEKS for less worry when you're away. Each mat absorbs up to 2 quarts of water then releases it slowly to the root areas of your potted plants.

Even when you're home, it's ideal for keeping groupings of smaller outdoor potted plants watered – saving you the time, worry and mess of everyday hand waterings. Also ideal for greenhouse use.

In a location away from excessive heat and direct sunlight, place mat on a large leak-proof tray, baking pan, cookie sheet, or tub.

Slowly and evenly saturate the mat with up to 2 quarts of water.

Place potted plants gently on mat, making sure pots have unobstructed bottom holes for roots to extract moisture from the mat.

Replenish mat with up to 2 quarts of water as needed every 2 to 3 weeks. To avoid tearing, do not try to move mat without a supportive carrying tray or tub.

Note: Results may vary between plant waterings. Plants have varying watering requirements. Location of the mat, amount of direct sunlight and other environmental conditions such as heat and humidity affect the longevity between plant waterings.

### **KEEP OUT OF DRAINS**

**Safe to use. Non-toxic. Store unused mat in original package in a dry environment. Keep out of reach of children.**
