

FOR IMMEDIATE RELEASE.....

JRM Chemical introduces their new **Soil Moist Transplant**. Soil Moist Transplant is formulated to inoculate trees, plants and shrubs during planting time. Soil Moist Transplant contains a diverse blend of five species of ectomycorrhizal propagules and seven species of endomycorrhizal propagules. Each pound contains over 5 billion colony forming units of bacteria, 5760 propagules of endomycorrhizal fungi and 586 million propagules of ectomycorrhizal fungi. **Soil Moist** water storing polymers are also incorporated in the mix to reduce waterings by 50%.

Soil Moist Transplant improves the soil and plant ecosystem while increasing plant growth and establishment. Available in premeasured 3oz retail bags, and commercial bulk sizes.

For more information on Soil Moist Transplant, and other mycorrhizal and polymer products, contact:
